

● poh.ge

● Based in Georgia · Decentralized AI compute

Decentralized AI compute, paid in GEL₮

Georgian-built compute for the **GEL₮** ecosystem — Tether's Lari stablecoin.

1 GEL₮ = 1 ₾

● Powered by the POH network

WHAT POH.GE DOES

A network that computes.

Distributed nodes

Compute spread across independent machines — no single data center.

Verifiable work

Every task is proven — proof of useful work, not wasted hashing.

Pay per use

Priced and settled in GEL₣ for the work actually done.

Settled in GEL₴.

GEL₴ by Tether

Tether's Georgian Lari stablecoin. Redeemable 1:1 for ₾.

Stable · redeemable 1:1

POH provides the compute

Decentralized AI compute for that ecosystem. Paid in GEL₴.

Proof of useful work

WHY HERE

Built in Georgia.

Stability

Growing
economy

Strategic
location

Crypto-
Friendly

THE PAIR

One network, two coins.

POH

POH

The community coin. Earned by contributing compute.

Community · growth

GEL ₮

₮

The payment rail. Tether's Lari stablecoin.

Stable · payments

1 POH ≈ **\$2K–5K** — one POH buys up to ~1 billion AI compute tokens. No fixed price: the market sets it via the best P2P order.

GET STARTED

Put your compute to work.

Run a node. Earn GEL₼.

Run a node – miner.poh.ge

Read the docs – miner.poh.ge/docs

Decentralized AI compute for the GEL₼ ecosystem • Based in Georgia.
